

## Summary

Motivated full stack web developer with experience in both front-end and back-end technologies. I began learning web development in high school and have worked on various projects at PESI company. Due to my ongoing studies in Automation, Cybernetics, and Robotics at Gdańsk University of Technology, my project involvement has been limited. My hobbies, including web development and 3D printing, significantly contribute to my knowledge and skills. I am seeking opportunities where I can gain constructive feedback and valuable experience, I value these aspects more than monetary compensation.

## Experience

### Full stack web developer

Pesi  
Remote work  
July 2022 / July 2024

I started working for PESI company at the age of 17. Despite balancing school and university commitments, I contributed to several projects. My primary role was as a front-end developer, though I also gained experience in back-end development. Notable projects include Energoobsługa.

## Education

Gdańsk University of Technology  
Gdańsk  
In progress

Completed two semesters in Automation, Cybernetics, and Robotics at the Faculty of Electronics, Telecommunications, and Informatics (ETI).  
As for education

Self-learner  
In progress

I have been learning web development since the second grade of high school. I have created several projects, which are available on my GitHub page.

I Akademickie Liceum Ogólnokształcące im. Zasłużonych Ludzi Morza  
Narcyzowa, Gdynia  
2023

During my preparation for final exams, I continued to learn and work at PESI company.
